"No Spark" Tow Chain Covers**

The "No Spark" Tow Chain Cover project began as a result of a Facebook post (Chetco Bar Fire Help Page out of Southern Oregon). It appeared at a time when Yuba County foothills were experiencing a significant number of roadside fires that were the result of dragging/sparking tow chains. A group of motivated and industrious ladies decided that it was time to "take action". The "rally cry" went out and our "fire family" answered the call. Cal Fire and USFS retire the heavy duty hose that is no longer usable for firefighting, however the hose is perfect for recycling into tow chain covers.

A great Christmas gift for anyone with a tow hitch is a set of tow chain covers and a car fire extinguisher as "fire safe".

We are asking for a donation of _____ per set, with 100% of the proceeds going to

Thank you for your support and safe travels.
